

High pressure pumps for waterjet cutting are available in two series

Hytron® high pressure pumps are realized as fully equipped units. All components required for an efficient and reliable operation of the pump are mounted on a base frame and are fully integrated into a sound insulated housing.

Ecotron® high pressure pumps in modular design especially for OEM's. It allows the adaption of high pressure system to the individual needs of the customer.

High Pressure Pump Series	Pressure [MPa]	Flow rate [l/min]	Power [kW]
Hytron® 35.11	350	1,2	11,0
Hytron® 40.19	400	1,9	18,5
Hytron® 40.30	400	3,4	30,0
Hytron® 40.37	400	3,8	37,0
Hytron® 40.55	400	6,8	55,0
Hytron® 40.75	420	7,6	75,0
Ecotron® 30.08	300	0,8	7,5
Ecotron® 35.11	350	1,2	11,0
Ecotron® 40.19	400	1,9	18,5
Ecotron® 40.30	400	3,4	30,0
Ecotron® 40.37	400	3,8	37,0
